Summary

I am currently a student in a full stack .NET bootcamp and looking for an opportunity to grow with a company as I build my skillset as a front-end developer. I started my career in residential concrete construction, rose through the ranks to become a project manager in anchoring systems for utility transmission lines before deciding to pursue my love of technology.

Skills & Technologies

Technologies: C#, ASP.NET, Web API, Git, Javascript, jQuery, Angular, Bootstrap, HTML5, CSS3, Adobe Photoshop CS6, Adobe Illustrator CS6

Skills: Object Oriented Programming, Code Quality Analysis, Unit Testing, Event Driven Programming, Project Management, Agile, Inventory Supply Management, Team Based Project Communication

Education

Nov. 2015 – Feb. 2016 **Full Stack .NET Web Development**, *Coder Camps*, Pearland, TX

Coder Camps trains software developers through an in-person, full-time bootcamp. Upon graduation students possess a tool belt to develop web applications from front to back.

Work Experience

Century Concrete Partners

Mar. 2015 – Nov. 2015 **Project Manager**, Houston, TX

- Oversaw a \$2 million project over 5 months using new hollow bar technology for foundation anchoring
- Managed 2 teams of 10 workers to keep a tight schedule in a consistently changing environment
- Controlled logistics for incoming and outgoing materials inventory
- Bid possible projects and onsite job previews
- Created and adhered to projected budget
- Learned and used client's proprietary billing software to invoice all company contracts

Mar. 2014 – Mar. 2015 **Safety Supervisor**, Freeport, TX

- Oversaw safety of 1 year long, \$6 million project on high voltage transmission line for chemical plant expansions
- Outfitted and arranged training for 20-30 employees throughout the duration of the projects
- Managed inventory of safety equipment and ensured adherence to usage policies
- Collaborated closely with multiple partner company's safety supervisors to create a culture of safety first

Oct. 2013 – Mar. 2014 **IT Specialist**, Traveling around the Southeast of the U.S.

- Configured and implemented work machines company wide to meet a newly formed uniform standard
- Trained management team in best practices and collaboration software
- Maintained in-field equipment for management team

Jun. 2012 – Oct. 2013 **Construction Laborer**, Traveling around the Southeast of the U.S.

- Helped make many multi-million dollar projects come to fruition first hand
- Traveled extensively to live and work on-site to meet tight deadlines
- Managed material acquisition for crew
